- Frontend: HTML | CSS | Tailwind CSS | React JS
- Backend: Node.js Express.js | Python
- Database: MongoDB | PostgreSQL | Firebase
- Others: JavaScript (ES6) | Rest APIs | JWT | Next.js
- Tools: VS Code | GitHub | Figma | Netlify | Vercel

Projects:

Boltu's Kitchen

Full-Stack food delivery platform | React, Supabase, Tailwind CSS

Link: [Live Site](#) || [Github](#)

Features:

- Users can explore dishes by category, place orders, submit reviews, and manage their own profile and order history — creating a smooth, interactive food ordering experience.
- Admins can manage users, track orders in real-time, and add, update, or remove dishes from the menu — enabling complete oversight of the platform's content and operations.

Technology : HTML, CSS, Tailwind, React JS, PostgreSQL (Supabase)

LangBridge – Your Personal Language Training Assistant

LangBridge is a full-stack web app that helps users learn languages by translating, creating flashcards, practicing with quizzes, and improving sentences with AI correction. | React, Tailwind CSS, MongoDB

Link: [Live Site](#) || [Github](#)

Features:

- Allows users to translate phrases, save personalized flashcards, and play text-to-speech audio for better pronunciation and retention.
- Users can submit their own sentences to receive grammar-corrected versions via an external grammar API, helping them improve writing accuracy and fluency through instant feedback.
- Automatically generates multiple-choice and fill-in-the-blank questions using the user's saved flashcards. Tracks scores in real time, stores quiz history per user, and offers a fun, interactive way to reinforce vocabulary retention.

Technology : HTML, CSS, Tailwind, React JS, MongoDB, NodeJs, ExpressJs

Course:

- Full-Stack Web Development Bootcamp - 2024

Language:

- Bangla (Native) & English (Fluent)
